12<sup>th</sup> December 2016

Dear Jane,

**Pearson BTEC Level 4 HNC Diploma in Construction and the Built Environment**  
**Pearson BTEC Level 5 HND Diploma in Construction and the Built Environment**

The Chartered Institute of Building (CIOB) is at the heart of a management career in construction. The CIOB are the world's largest and most influential professional body for construction management and leadership.

The CIOB recognises the Pearson BTEC Higher Nationals in Construction and the Built Environment as providing a programme of skills and knowledge that contributes to the ongoing education of students towards Level 6 and prepares them for achieving MCIOB status.

The range of pathways available in the Higher Nationals in Construction and The Built Environment provide students with a range of opportunities to develop the necessary knowledge and skill to work in many different areas of the construction industry. Pathways at Level 4 and Level 5 include units specifically designed to provide students with the requisite skills to work in site management, site supervision, project management and construction management.

The CIOB recognises the role that the Higher Nationals in Construction and The Built Environment play in providing students and employers with an alternative route to employment and degree qualifications, through the provision of a nationally standardised approach to curriculum and assessment.

The CIOB is happy for its name and web address to be made available on Pearson websites to confirm that we recognise your qualifications.

Yours sincerely,

Rosalind Thorpe  
Head of Education  
Education Department (Operations)
